## EDUCATION

### JIMMA UNIVERSITY 2018 - 2022

- BSc in Software Engineering
- GPA: 3.47

## TECHNICAL SKILLS

### Frontend Development

- Angular (Components, Services, Routing, Forms)
- TypeScript, JavaScript (ES6+)
- HTML5, CSS3, Tailwind
- Responsive & Mobile-First Design

### Backend Development

- PHP, MySQL
- ASP.NET Web API

### DevOps & Collaboration Tools

- GitLab (Version Control, Merge Requests, CI/CD)
- Jenkins (CI/CD Pipelines)
- Docker (Containerization, Image Management)

### IT & Systems

- Windows Server Administration
- LAN/WAN Setup & Troubleshooting
- Computer Maintenance & IT Support
- CCTV Installation & Configuration

### Tools & Other Skills

- Git & GitHub
- Project Coordination & Documentation
- Basic System Security & User Management

## ANGULAR FRONTEND DEVELOPER | IT SUPPORT SPECIALIST

## PROFILE

Angular-focused Frontend Developer and Software Engineer with hands-on experience building responsive, user-friendly web applications using Angular, TypeScript, HTML, CSS, and JavaScript. Experienced in integrating frontends with ASP.NET Web API and PHP-based backends, and in working within DevOps-driven environments using GitLab, Jenkins, and Docker. Strong background in IT operations, system automation, and infrastructure support. Passionate about clean architecture, CI/CD practices, and delivering scalable, production-ready solutions.

## WORK EXPERIENCE

### Alet Technologies

2025 - PRESENT

#### Angular Frontend Developer

- Developing and maintaining modern Angular-based frontend applications with a focus on performance, scalability, and clean UI/UX
- Building reusable components, implementing routing, form validation, and state handling. Integrating frontend applications with backend services and RESTful APIs.
- Collaborating with backend developers and designers using GitLab for version control and merge requests.
- Participating in CI/CD workflows using Jenkins and Docker to support efficient build and deployment processes

### Super Double T General Trading Plc

2022 - 2025

#### Software Developer / IT Support

- Designed and developed internal business systems including stock management, clinic patient records, and logistics tools
- Led frontend development of a Logistics Management System using Angular, implementing reusable components, routing, and API integration with ASP.NET Web API
- Designed, deployed, and maintained the company website: rodaspaints.netlify.app
- Automated internal reporting processes to improve data accuracy and operational efficiency
- Provided IT support including system maintenance, LAN/WAN setup, and user assistance.
- Administered Windows Server for secure domain access and user account management
- Installed and configured CCTV security systems for office and warehouse environments
